2025-10-20 - Meeting **TF** Waste

Proposed agenda is as follows:

1. Updated Position Paper – waiting for further integrations, we shall decide a date as a deadline for changes/amendments
2. Response to Questionnaire – Discussion
3. Participation Technicalities – How to respond, who's going to do that? (update on WAREG involvement – if no longer available, I am volunteering to send TF contribution as an individual "qualified" as TF representative)

Discussion

About 1.

- RAAEY to send by 20/10/2025 comments to the position paper of WAREG
- RAAEY is also participating in another process of consultation to the CE consultation
- ERSAR to send comments to the WAREG paper by 22/10/2025.
- ERSAR to propose for each country to present the view as national regulator's position. The idea is to have any member participating on their own.
- ERSAR presented 2 options:
    - A) we go alone
    - B) WAREG Board approves a letter to accompany the participation to the Board Meeting.
    - C) Each single Members goes individually but with an accompanying letter signed by each member, without having any reference to WAREG's name.
- MEKH support any consensus that develops, positive about any possible change.

Points to modify: Cap and trade and transboundary shipments of waste among EU Members.

ERSAR: Reference to mixed waste.
